| Notes | We are doing the acceptance test within the same group because the group we originally were going to do them with has decided to drop out at the last minute and we cannot find anyone else to replace them. |
| | We are aware this is not optimal, but we have no choice. At the very least we have taken the precaution of making sure that the person who tests the project is whoever has been least involved with the development of that project in particular, to ensure that it's properly tested. |

Bug in use case 5/2 Open application

Description

It has been suggested to do an application for the first visa, which already have an application from the logged user. The system must detect it and return to the main page showing that that resource already exists, however it has been indicated to the tester that a normal behavior should happens, filling out the form and creating the application.

Results

The tester has indicated that he has been redirected to the main page, but he hadn't mentioned anything about the error.

Bug in use case 5/3 Open application

Description

When a credit card with an expiration date less than three month from now is entered a error is shown telling that it has to be greater than three month, however it has been set as expected an error telling that the action couldn't be committed.

Results

The tester has informed that he has got an error distinct from expected.

Bug in use case 8/2 Link applications

Description

When two applications whose visa is from different countries are tried to be linked an error is shown telling that it's forbidden. It has been modified so that the action couldn't be committed but the tester has been told that the correct error should be shown.

Results

The tester has detected the error and has reported it.

Bug in use case 19/3 Create user accounts for new officers

Description

The tester has been told to create an account with the user name "officer3", which it's already in use and the system detects it as duplicated, showing an error that indicate it.

Results

The tester has detected the error and he has reported it correctly.

Bug in use case 44/1 Delete requirements

Description

The method has been modified so that it does the normal behavior, but it doesn't remove the requirement.

Results

The tester has informed that he is returned to the list page, but doesn't mention if the requirement keeps appearing or not
